

# LIQUICELL®

## Shear Points® SKIN FRICTION PROTECTORS

The ultra-thin and nearly invisible liquid-filled membranes of LiquiCell Shear Points provide a synthetic, external bursa that allows the body to glide or float with an object aiding in the reduction of shear and friction of the skin.

- Self-adhesive Shear Points can be applied to the bridge of the nose, orbits of the eyes, ears, back of the heel or any other area at risk of skin breakdown due the presence of shear and friction.
- Excellent for use with Oxygen Masks, Oxygen Tubing, CPAP Masks, Bilevel Masks, Braces, Casts or any other medical device that contacts the skin.
- Gentle skin-sensitive adhesive keeps LiquiCell Shear Points securely in place.
- Transparency allows for easy monitoring of skin condition without removal!

Latex-free  
Mercury-free  
FDA registered (available upon request)

How Supplied:

	Size	Item Number	Box
Small	56 mm	94201	100-Ct (10x10-packs)
Medium	70 mm	94204	100-Ct (10x10-packs)

LiquiCell® is a medical technology that helps prevent skin tissues from being stretched or torn. The ultra-thin cells contain a liquid that is in constant motion allowing the body to glide or float with an object both reducing shear and friction of the skin and improving blood perfusion to the tissues.
