

SHEAR REDUCING MATTRESS MEMBRANES

Allows the body to glide or float
reducing shear and friction.

LiquiCell® is a medical technology that helps prevent skin tissues from being stretched or torn. The ultra-thin cells contain a liquid that is in constant motion allowing the body to glide or float with an object both reducing shear and friction of the skin and improving blood perfusion to the tissues.

Unique Features:

- For use at those body areas most susceptible to skin breakdown due to the presence of a bony prominence along with shear and friction
- Superior to other products such as gel and foam at addressing shear and friction associated with skin breakdown
- 36" x 9" membrane is sized for easy positioning and flexibility of use
- Waterproof and easily washable
- Latex-Free/Mercury-Free

DESCRIPTION	ITEM NUMBER	DIMENSIONS
Shear Reducing Mattress Membrane	94212	36" x 9"

Providing quality patient care since 1948.
